

Spreader-Bar

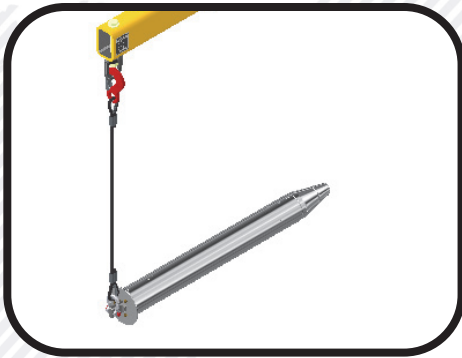

Spreader-Bar

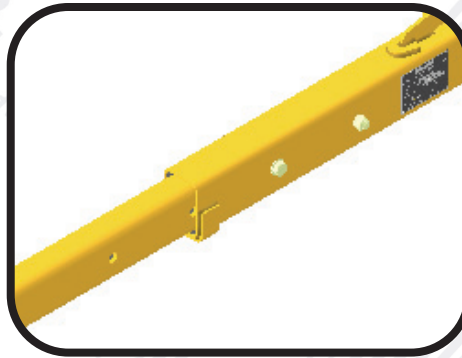

THE SPREADER-BAR LIFT IS AN EASY TO USE HIGH-STRENGTH ATTACHMENT THAT ALLOWS THE USER TO LIFT LARGE GEOSYNTHETIC ROLLS UP TO 5,500 LBS.

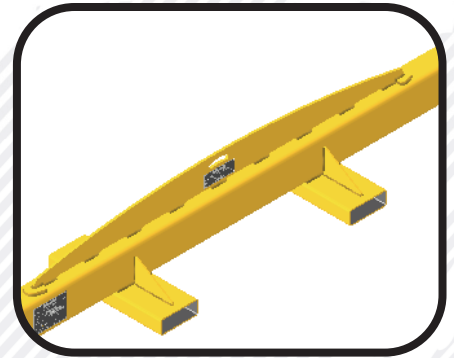

SHOWN W/ SPINDLES AND LIFT CABLES
(INCLUDED OR SOLD SEPERATELY)

Two high-strength Aluminum spindles are provided for quick and easy roll engagement. A quick release hook is provided for efficient packing and unpacking.

An extendable beam provides adjustability for a wide range of roll widths as well as an efficient way to pack and unpack the Spreader-Bar.

Two high-strength forklift tubes allow for quick pickup and maneuverability of the Spreader-Bar.

INFORMATION ON A TEST DRIVE

The Spreader-Bar High Strength deployment device provides users with an easy way to pick up and effectively work with large rolls of Geosynthetics. This Spreader-Bar alongside Demtech's Pro-Puller Winch provides an efficient solution to deploying heavy rolls across large jobsites.

- Strength, the Spreader-Bar is designed to carry up to 5,500lbs.
- Easy, simple assembly ensures minimal training and efficient operation.
- Lightweight, Aluminum spindles provide a strong lightweight interface with your roll.
- Versatility, able to carry rolls of all different lengths and sizes across the entire jobsite.
- Rigidity, a strong beam minimizes the lift height needed to hold the roll steady.
- Steel braces provide support while loading and unloading heavy rolls.
- Tested, every Spreader-Bar is thoroughly tested and certified prior to being shipped.
- The Spreader-Bar works great alongside Demtech's Sheet Deployment Winch.
- Designed and Manufactured in the U.S.A.!
